

Name of the Faculty Member: Prof. Ubba Savita

Name of Activity: Magical Tiles (Problem-solving Activity)

Name of Course/PAPER: MBA-106 Business Communication

Semester: I

Brief Description: This activity helps to enhance the communication skills, leadership skills, problem solving skills of the students. The students are told (in a group of 8-10 students) that they are stuck in a factory with a special chemical spread on the floor. This chemical can make them invisible. Now the only solution to get out is using the magical tiles. But if the magical tiles are in contact with chemical any of the body part of the student should be in contact with the tile. With this doesn't happen, the group will lose the tile and will have to perform with remaining tiles. The group is initially given 4 tiles to get out of the problem. The students group have to rescue all the members of the group.
